With particularity, there is no evidence that angiogenesis inhibition is an inherent feature of all antibodies that specifically bind denatured collagen(s) but binds the native triple helical form of said collagen(s) with reduced affinity. Moreover, the prior art is silent on whether the prior art antibodies inhibit angiogenesis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
